Importance: High

Misty:

The attached files contain the DRAFT SPCC Inspection Report, NOI, Tentative ESA, and in some case the NRC Report. The file is pending final review and transmittal to Frankie in Enforcement for processing. Additional tentative enforcement cases for FY2016 will follow....Tom

Chris, please note that Tom just called to have the **NOTE**: below reworded to improve what I hastily put together in the earlier email.

Thank you,

Hello Chris,

Attached are the documents for **Hughes Tank Battery** from the 01/05/2016 inspection. This email includes the (signed) SPCC, NOI, and, ESA documents.

Below are Tom McKay's comments from his 01/08/2016 email :

The attached files contain the signed SPCC Inspection Checklist with attached Photo-Log, the tentative ESA, and the scanned Notice of Inspection regarding an SPCC production inspection conducted on 1/5/2016 at the Hughes Tank Battery dba New Dominion, LLC located in Logan county, Oklahoma (**R6-OK-01236; SPCC-OK-2016-00039**). The inspection was predicated upon a prior reconnaissance and the documentation of SPCC deficiencies.

The inspection resulted in a tentative ESA totaling \$2925. I'll be submitting the complete inspection file to ya'll shortly for appropriate processing and filing.

NOTE: On 01/12/2016 Tom forwarded emails from Tom Chernicky with photos to show the tanks were permanently closed AFTER the inspection on 01/05/2016.

Thank you,

Betsy Fausel (NOWCC Grantee)

***** (To Facility)

Mr. Chernicky,

Attached is the report for the SPCC inspection conducted by Tom McKay on January 5th, 2016. Please reference that report to identify deficiencies that were observed during the inspection. You are urged to correct those deficiencies as soon as possible as well as document any corrections or improvements made. The deficiencies found met the minimum threshold for a penalty action and a copy of the SPCC report has been submitted to our Enforcement Group. They will contact you should a penalty action be required.

Please coordinate with Tom McKay on any further facility changes. He can be contacted at mckay.tom@epa.gov or (214) 665-2180.
